EDITORIAL TEAM:

Habiba Al Mar'ashi, Urvasi Punjabi, Namirah Ahmad
Carlo Cuarto, Jipson Joy

DESIGNED BY:
Harris Laluan

Habiba Al Mar'ashi

Dear Members & Readers,

The UAE's efforts to achieve Net Zero by 2050 are in full swing! It is the first in the MENA region to take on this strategic initiative, in line with the Paris Agreement, to reduce GHGs naturally resulting in the halt of global temperature rise to 1.5 degrees Celsius. But how is UAE achieving these goals? And as citizens and residents of this country what is that we can do to accelerate the process?

It is very important to understand that to create a healthy and sustainable environment, one must first learn to keep the very components that make up the environment, in good condition. Just as we need to keep the different areas of our homes clean regularly and not neglect any part of our home, so do we need to do the same for the land that we reside on. Failing to do so results in turmoil and today we are faced with the 'Triple Planetary Crisis'.

I accentuate a global initiative is required urgently to coordinate and increase the collaboration at both the global and regional levels. This means accelerating, articulating and applying simultaneously climate centric policies and actions at local, regional, national and global scales. We, at the Emirates Environmental Group are pushing the envelope and going to extreme lengths to inspire and urge members of the society to act responsibly and proactively towards environmental protection and preservation to enable us to achieve a development that is sustainable.

It gives me immense joy to share that EEG collected 260,351 kg of paper waste in September, marking the highest collection since the inception of the paper collection campaign in 2001. I would like thank each and every contributor and urge all to continue the momentum towards building a circular economy. The month of September was packed with meetings, webinars, plenary sessions and several international engagements.

The month of September marked the end of summer and the beginning of the active season, we at EEG were ever ready for that. On 5th September, I virtually attended a launch webinar of a white paper entitled "Building Blocks for Developing an ESCO Market in Lebanon" authored by our sister organisation the CEBC and the Issam Fares Institute for Public Policy and International Affairs (IFI). Read more on page 3. The Internationally recognised ICGN Global Awards Committee invited me to be a part of a highly dignified assemblage of judges from diverse professional backgrounds on September 13th. Read more on page 3.

Taking full advantage of the Green Building Week from 12th - 16th September as a Co-Founder of the Emirates Green Building Council (EGBC) and Board member of the World Green Building Council (WGBC), I attended the #BuildingToCop27 forum virtually along with my actual attendance at the MENA NET Zero Collaborators programme on 14th September whereby I gave the Keynote address and also chaired a panel discussion on 15th September 'Building for the Economy' at the Dubai Chambers of Commerce. Read more on page 3.

Continuing the events on September 15th, I attended the GISD Work Stream Meeting on SDG-related metrics, Read more on page 3. I further attended the ICC UAE & Business Councils Meeting held at the Dubai Chambers on 16th September, it focused on the expansion of Global Trade

within the UAE. Read more on page 4. It was a pleasure to be a judge and a member of the Judging Panel for the sixth edition for Arab Star-Pack Student 2022. The final judging took place on 20th September. Read more on page 4.

Emirates Environmental Group was proud to showcase its work and accomplishments in the field of environmental action at The Water, Energy, Technology and Environment Exhibition (WETEX) 2022 between the 27th - 29th September. On 28th September, EEG conducted a successful workshop at Education and Innovation Hub at WETEX under the topic "Redefining Waste: Contemplating Sustainability". Read more on page 4.

EEG strongly believes that "Children are our most valuable resource" and in order to build an environmentally conscious and sustainability centric nation, EEG catalyses action at the grass roots level. This is achieved by collaborating with academia to advance environment literacy of the youth. As a part of this commitment, EEG on 29th September attended the 2nd Local Advisory Body meeting of Our Own High School Al Warqa 'a Dubai to provide constructive support and guidance.

EEG is at the forefront when it comes to equipping our student community with means to achieve carbon neutrality in line with the country's mission! The 12th cycle of the Neighborhood Recycling Project concluded on 30th September with heartwarming participation. Read more on page 5. Phase 2 of our "One Root, One Communi-Tree" project is continuing until 22nd November 2022. I urge you to utilise the opportunity to make a positive difference. A small contribution goes a long way. Read more on page 4. EEG's 5th Panel Discussion of 2022 is scheduled to take place on Thursday, 20th October 2022 in a hybrid format under the theme "Achieving Net Zero: Spotlighting Urban Sprawls". Turn to page 5.

The next two months will be very engaging and productive for EEG's educational programmes. The registration for the 'Inter College Environmental Public Speaking Competition' on popular request has been extended to 15th October 2022 with limited seats available. I once more ask for your speedy registration in both the ICEPSC as well as the Students Workshops that will be held virtually under the theme "The Quintessential Net Zero" from 24th - 26th October. Turn to page 6.

A campaign that will always remain close to my heart, is the 'Can Collection Campaign' which was the first community based programme that we launched in 1997. We will conclude the 26th cycle of the CCDrive on 5th November, and we have collected so far 10,313 kg of our 20,000 kg target, completing 51.6% of our goal. Registrations are flooding in and I am looking forward to yet another fruitful end to the year. Turn to page 6.

Another campaign that receives much love and support, is the 'Clean UAE' it is running in its 21st consecutive year under the patronage of the Ministry of Climate Change and Environment, from 5th to 15th December 2022, adding yet another feather to our hat. Register now and don't miss out on this wonderful voluntary platform. Read more on page 6.

To conclude, I would like to remind everyone that a little goes a long way. Let us follow the examples of our great leaders and work together for a better environment.

5th
September**CEBC on Building Blocks for Developing an ESCO Market in Lebanon**

EEG attended on 5th September a launch webinar of a white paper entitled “Building Blocks for Developing an ESCO Market in Lebanon” authored by the Clean Energy Business Council (CEBC) and the Issam Fares Institute for Public Policy and International Affairs (IFI) at the American University of Beirut (AUB). In the past years, the power supply in Lebanon has become highly erratic, with the publicly provided, Electricité du Liban, electricity increasingly being replaced by expensive private diesel-powered generators that are a major source of pollution blanketing urban areas, with severe negative health impacts. Lebanon has substantial, largely unexploited, renewable energy potential: hydro, wind, and solar.

Despite this potential, Lebanon has become extremely fossil fuel dependent with a highly inefficient power supply, power stations beyond their technical and economic life and a sector characterised by waste, corruption and inefficiency. Improving energy efficiency and changing the energy mix towards renewables are the first steps. Building an ESCO market should be an element in an inclusive energy policy within a more comprehensive economic policy and institutional reform framework. The paper aimed to set the basis for the development of an ESCO market in Lebanon in the coming years by identifying building blocks and analysing best practices and trends, both at the international level, and specifically in the MENA region, focusing on the UAE, Saudi Arabia, Morocco, and Oman. It also dived into the nascent ESCO market in Lebanon, through the dissection of the current legal and institutional frameworks, before proposing some concrete recommendations at the policy, technical, and financial levels.

13th
September**ICGN Global Stewardship Awards 2022**

Co-Founder and Chairperson of the Emirates Environmental Group, Mrs. Habiba Al Mar'ashi, took part in the prestigious and internationally recognised ICGN Global Stewardship Awards 2022 as one of their esteemed judges amongst a panel of five other dignitaries from around the globe. The Stewardship Disclosure Award is to honour Asset Managers that follow a full-fledged protocol in maintaining transparency of the impact and implementation of their policies with over US\$ 60 billion assets under management.

The criteria was simply to award the best disclosure model which could further be followed by others in the future. These awards measure the execution of stewardship by the investor and asset owners backed by clear documentation, as well as the policies highlighting their CSR and the practices used to implement them. The award recipients will be confirmed by the ICGN Awards Committee and the winners will be disclosed at the ICGN Awards Ceremony and Webinar on 1 December 2022.

14th - 15th
September**14th - 15th Green Building Week 12-16 September 2022**

Co-Founder and Chairperson of EEG, Co-founder & Treasurer of The Emirates Green Building Council (EGBC) and Board member of the World Green Building Council (WGBC), Mrs. Habiba Al Marashi, was an active attendee at the MENA NET Zero Collaborators programme on 14th September in line with the UAE's effort in achieving Net Zero carbon emissions by 2050. The programme highlighted the role of collaborators in the expedition of sustainable built, green infrastructures within MENA, upholding their efforts in decarbonising the environment. The strategic initiative calls on the shift to the use of clean and renewable energy sources in a mission to reduce GHGs.

Collaterally, Mrs. Habiba attended the #BuildingToCop27 Forum on the 14th and chaired a panel discussion on 15th September 'Building for the Economy' at the Dubai Chambers of Commerce. It stressed the threats the population is set to face by 1.6 billion urban dwellers exposed to high temperatures and at risk of coastal flooding. This can be negated with the integration of sustainable builds as 40% of the global carbon emissions are due to poor and unhealthy buildings. The idea centers around designing for resources in a way to keep the materials in, and the waste out. Creating an ongoing loop of what goes around comes around, but with renewable sources which will in turn heavily aid in reducing GHGs. Further, this will benefit companies in assessing their ESGs such as their financial responsibility towards their climate commitments, transparency of policies and employee well-being, to name a few. To conclude the matter, in order to collectively reach Net Zero Emissions by 2050 and align with the ambition and goals of the nation, the collaboration between different entities, sectors and industries to mitigate carbon emissions is a combined effort and the only way to move forward.

15th
September**GISD Work Stream Meeting on SDG Reporting and Metrics**

EEG Co-founder & Chairperson Ms. Habiba Al Mar'ashi, attended virtually the GISD Work-stream Meeting on 15th September. The discussion revolved on the recognition of the two exposure drafts set by the International Sustainability Standards Board (ISSB).

It proposed the General Requirements for Disclosure of Sustainability-related Financial Information and Climate-related Disclosures. To allow investors to assess the risks and opportunities within these areas. Other key takeaways observed from the report was to offer quantitative metrics in line with qualitative ones with main public targets using these metrics.

16th
September**The ICC UAE & Business Councils Meeting**

Ms. Habiba Al Mar'ashi Co-founder & Chairperson of the Emirates Environmental Group, attended the ICC UAE & Business Councils Meeting held at the Dubai Chambers on 16th September 2022. The accelerated objectives to expand trade and business within the UAE has earned the nation a spot as one of the fastest growing trade hubs in the world. The Commission on Customs and Trade Facilitation plays a pivotal part in pushing the boundaries of global trade in the UAE to its optimum. Seeing the success of the operations at base level has urged the business community to come together in breaking new barriers and develop new standards in the trade and business industry.

20th
September**Sixth Edition for Arab Star-Pack Student Awards 2022**

In EEG's capacity as a full voting member of World Packaging Organisation, Ms. Habiba Al Mar'ashi Co-Founder and Chairperson of EEG, was invited to join a jury panel for the 6th Edition of Arab Star-pack Student Awards 2022. The judges evaluated products that promote durable food and smart waste packaging designed by students under 4 categories:

Visual Packaging Category

Structural Packaging Category

Save the Food Category

Smart Waste Packaging Category

She evaluated over 160+ applications from across the Arab region. The preliminary judging took place in August. Once the judging committee tallied and finalised the top scorers, all the judges were invited to meet virtually on 20th September. After much deliberation and final round of votes, the judges finalised the winners under each category.

27th - 29th
September**WETEX**

WETEX and Dubai Solar Show organised by Dubai Electricity and Water Authority (DEWA), are in line with Dubai's vision to build a sustainable future for the Emirate and is held annually under the directive of HH Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE, Ruler of Dubai and under the patronage of HH Sheikh Ahmed bin Saeed Al Maktoum, Chairman of the Dubai Supreme Council of Energy. The exhibition was being held from 27th to 29th September 2022.

The region's largest sustainability and clean energy technology exhibition provided an ideal opportunity for local and international companies and organisations to share and showcase their products and services, along with offering a forum to share best practices and experiences with exhibitors from around the world. EEG was a proud exhibitor there as well and has been since the inception of WETEX. The EEG stall was busy with visitors representing the private sector, the government institutions and students from different colleges and universities in the country. To build an enduring society, it becomes important to understand how young innovative minds combined with creative technologies can lead the world towards a more sustainable future. To support that, DEWA and Dubai Solar Show 2022, organised The Education & Innovative Zone. EEG joined by conducting a workshop under the topic "Redefining Waste: Contemplating Sustainability" on 28th September.

**One Root, One Communi-Tree (OROC)**

EEG's Phase 2 of the "One Root, One Communi-Tree" project was rolled out on 22nd July and will run until the 22nd November 2022. The ethos of this campaign stands on two pillars: Cultivate recycling and cultivate land. Under this project, the participants who deposit a pre-set target of recyclable materials will be eligible for a certificate and as an additional bonus, trees to plant at the end of the year. Till the 30th September, 222 participants have registered. A total of

	319,820 kgs	Paper		21,352 kgs	Plastic		1,077 kgs	Aluminium Cans		21,246 kgs	Glass		620 pcs	Toners		568 pcs	Mobile Phones		3,315 kgs	E-waste
--	-------------	--------------	--	------------	----------------	--	-----------	-----------------------	--	------------	--------------	--	---------	---------------	--	---------	----------------------	--	-----------	----------------

have been deposited under this project which lead to the participants being eligible to plant 511 trees under their names. The meaningful campaign has numerous positive benefits as it allows the participants to show their contribution towards sustainability. Do not miss out on the opportunity and enroll yourselves in the "One Root One Communi-Tree".

Follow the link to register for this project:

Neighbourhood Recycling Project

The 12th cycle of the “Neighborhood Recycling Project” (NRP) successfully concluded with the participation of 90 students on 30th September. 66 Participations achieved their targets resulting in contribution of 115 trees to be planted on 22.12.22

The active participants collected:

The contribution transpired in

We are grateful to all the Students members and non-members for coming forward and to contribute towards a Sustainable Future!

Educational News

2nd Local Advisory Body meeting of Our Own High School Al Warqa 'a Dubai

As a UNEP accredited organisation, Emirates Environmental Group through its engagements continuously strives towards implementing the UN SDG Goal number 4 by educating, building the capacity and empowering the younger generation to contribute towards sustainable development of the UAE and achieve the United Nations Sustainable Development Goals.

EEG was invited to be a part of Local Advisory Body (LAB) of Our Own High School Al Warqa 'a Dubai. The LAB meeting will be conducted four times a year to review plans and policies and provide perspective on the progress made by the school towards its objectives. On the 29th September, EEG attended the 2nd LAB meeting. The session had several representatives to support and provide constructive feedback to the school on its ongoing and upcoming initiatives in various domains.

Upcoming Events

EEG's 5th Panel Discussion 2022

EEG's 5th Panel Discussion of 2022 is scheduled on Thursday, 20th October 2022 in a hybrid format under the theme “Achieving Net Zero: Spotlighting Urban Sprawls”.

The panel discussion will aim to look at the types of buildings, their usage, construction materials, energy consumption, and carbon offsetting capabilities amongst other aspects of sustainability. This discussion will address several of the United Nations' Sustainable Development Goals including SDG 11: Sustainable Cities and Communities, SDG 12: Responsible Consumption and Productions, SDG 13: Climate Change & SDG 17: Partnerships for the Goals.

The session is being conducted in collaboration with Arabia CSR Network (ACSRN), Clean Energy Business Council (CEBC), Swiss Business Council (SBC) and Emirates Green Building Council (EGBC), etc.

KEO is the co-sponsor; Smart Automation Energy is the support sponsor, while Holiday Inn Dubai - Al Barsha has provided the venue for the discussion.

To join this interactive discussion, register here:

Students Workshops

EEG believes if the minds of the student community is ignited, it can unlock their hidden talents and potential. Do you have the passion to develop sustainable solutions to critical environmental issues? Well, we have an ideal platform for you! EEG's series of Students Workshops play an instrumental role in bringing a sea of positive change to the world. The Students Workshops are significant in the sense that they provide an ideal platform to the Youth in the country to critically analyse environmental issues and analyse, discuss and prepare solutions for a sustainable tomorrow!

It is scheduled to take place virtually under the theme "The Quintessential Net Zero" from 24th - 26th October, please follow the link to participate in this programme.

[Register Here](#) 

Can Collection Drive

The "Can Collection Campaign" was EEG's first environmental action oriented programme initiated in September 1997. It gained tremendous support from all sectors of the society; be it government, private sector, academic institutions or families. The upcoming 26th cycle is no different. EEG has kick started the preparations for the drive with the series of volunteer meetings where in Tristar, Abela & Co, Lucky Group, Dubai Petroleum, Bright Environment, ISS Relocations, AG Engineering and McDonalds UAE have come forward to collectively support EEG is spreading the word to protect our environment and encourage community based recycling habits.

EEG as an accredited NGO of the United Nations Environment Programme, and the United Nations Convention for Combating Desertification, will be conducting this important event that shall result in the direct deliverables of UN SDG's of #11, #12, #13, #14, #15 & #17. The Can Collection Drive will be held on Saturday 5th November 2022. It is already receiving registrations from hundreds of participating entities particularly the hospitality sector.

If you haven't registered, then what are you waiting for? Follow the link to register now.

[Click Here](#) 

Inter College Environmental Public Speaking Competition 2022

'Inter College Environmental Public Speaking Competition' is one of EEGs educational platforms through which we provide the current generation an opportunity to delve into concepts of sustainability such as global degradation, pollution, low carbon economy, net-zero emissions and to learn the value of sustainable future and methodologies to tackle environmental challenges. Registrations are coming in wonderfully from PAN MENA countries. Looking at the popularity of this programme and due to several requests, EEG has decided to extend the registration until 15th October 2022. EEG invites all universities to reinforce the confidence and critical thinking skills of their students and feed their minds with sound environmental knowledge along with the opportunity to connect and widen their societal network. All you need to do is follow the link, choose the suitable topic as per the specific category and register.

Registrations are being accepted, but seats are limited. So ensure to reserve your seat at the earliest.

[Register Here](#) 

Clean UAE

We are delighted to update that for the 3rd consecutive year, Clean UAE campaign is being conducted under the prestigious patronage of Ministry of Climate Change and Environment of UAE. McDonald's UAE is the co-sponsor of this campaign. Dubai Investments and UPS are the support sponsors. Tetra Pak is a supporting entity. It is only with the dedication and commitment of such organisations and with visionary leaders at the helm that we are able to achieve the success that we envision for our programmes.

With the support of the local community, EEG hopes to continue to grow the Clean-Up Campaign in the coming years to combat the ever growing amount of recyclable materials going to landfills and counteract the negative mentality of littering, ultimately paving the way to a cleaner and more sustainable UAE. We at the Emirates Environmental Group put in constant effort into protecting the local environment of the UAE. However, this can be done only with continues support from our members, academic institutions, government bodies, corporations and other sectors of the society. In order to become one step closer to a greener future we need everyone's cooperation to act as a team, to work in a way that fulfills our motto 'Together For a Better Environment'. The schedule for the campaign is as below:

Date	Day	Emirate
5 th December 2022	Monday	Ajman
7 th December 2022	Wednesday	Fujairah
8 th December 2022	Thursday	Sharjah
10 th December 2022	Saturday	Dubai
12 th December 2022	Monday	Ras Al Khaimah
13 th December 2022	Tuesday	Umm Al Quwain
15 th December 2022	Thursday	Abu Dhabi

Follow the link to register for this one-of-kind nationwide campaign.

UNCCD
NEWS

Remarks by Executive Secretary of the United Nations Convention to Combat Desertification

In a recent statement by Mr. Ibrahim Thiaw, Executive Secretary of the United Nations Convention to Combat Desertification, he mentioned that G20 joint environment and climate ministers' have made a multitude of commitments to restore planetary health. The focus of the UNCCD is: turning commitments into actions. This means achieving land-degradation neutrality - including restoring land and helping drought-prone countries to put in place drought-smart strategies. The UNCCD supports, for instance, the Great Green Wall initiative, which aims to restore 100 million hectares of degraded land, sequester 250 million tonnes of carbon and create 10 million green jobs in the Sahel by 2030. UNCCD has been working with the Kingdom of Saudi Arabia to operationalise the Global Initiative to support countries with their restoration efforts. Like-wise the Saudi-led Middle East Green Initiative, aims to back regional nature-based solutions and plant billions of trees. Most recently, the 2.5 billion dollar Abidjan Legacy Programme launched by President Ouattara at the 15th Conference of the Parties held in Abidjan under the leadership of Côte D'Ivoire, will help future-proof supply chains while tackling deforestation and climate change.

UNEP's Frontiers Report 2022

"Humanity has altered the planet in many detrimental ways, from the warming of our climate to the ever-diminishing wildernesses on land and in the sea. But in such a complex system as the Earth, science must always keep searching - for both solutions to problems already identified and new threats coming our way." - Inger Andersen, Executive Director - UNEP. The UN Environment Programme (UNEP) works to identify and draw attention to emerging issues of environmental concern. The UNEP Frontiers' report continues to advance this work, signaling environmental issues and solutions for effective and timely responses. Some issues may be local, relatively small-scale issues today, but may have the potential to become an issue of regional or global concern if not addressed early. UNEP's Frontiers Report does this by identifying and exploring areas of emerging or ongoing environmental concern. The 2022 edition delves into three issues: noise pollution in cities, the growing threat of wildfires and shifts in seasonal events - such as flowering, migration and hibernation, an area of study known as phenology. This report helps us understand that learning from ecosystems and how to live within them in harmony are objectives that we all need to adopt.

The Gender Snapshot 2022

In the month of September, UN Women and the UN Department of Economic and Social Affairs (UN DESA) launched a special report which highlights that, at the current pace of progress, SDG 5 - achieving gender equality - will not be met by 2030. At the current rate of progress, it may take close to 300 years to achieve full gender equality, the Progress on the Sustainable Development Goals (SDG): The Gender Snapshot 2022 shows. Global challenges, such as the COVID-19 pandemic and its aftermath, violent conflict, climate change, and the backlash against women's sexual and reproductive health and rights are further exacerbating gender disparities. The report estimates that it will take up to 286 years to close gaps in legal protection and remove discriminatory laws, 140 years for women to be represented equally in positions of power and leadership in the workplace, and at least 40 years to achieve equal representation in national parliaments. To eradicate child marriage by 2030, progress must be 17 times faster than progress of the last decade, with girls from the poorest rural households and in conflict-affected areas expected to suffer the most. The report also points to a worrisome reversal on the reduction of poverty, and rising prices are likely to exacerbate this trend.

Dubai National School, Al Twar	Renewal

The collection of materials for recycling in the month of September resulted in the following benefits:

- » **GHG Reductions 1,046 (MTCO₂)**
- » **Saving of 6,778 Million BTU of Energy**
- » **Saving of 1,365 m³ of Landfill Space**
- » **Saving of 4,743 trees from being felled**
- » **Saving of 1,574 Gallons of Gasoline**

PAPER COLLECTION CAMPAIGN	School	Quantity (Kg)	Families	Quantity (Kg)
EEG has collected 260,351 kg of Paper from 227 participants during the month of September 2022, an increase of 77% compared to August 2022. We encourage our participants to be actively involved in our Campaigns in the year 2022 to enable us to work towards our set target. The Top Collectors were:	Delhi Private School Sharjah	2,160	Fateem Ali Al Zaabi	931
	American School of Dubai, Al Barsha	2,075	Khushi Solanki	580
	Our Own High School, Al Warqaa	1,660	Aarush Dangra & Nia Treeza Tony (Tie)	540
CAN COLLECTION CAMPAIGN	School	Quantity (Kg)	Families	Quantity (Kg)
EEG collected 1,041 kg of Aluminium Cans from 37 participants during the month of September 2022, an increase of 133% compared to August 2022. We urge our participants to be actively involved in the CC Campaign this year to enable us to achieve the 20,000 kg target. The Top Collectors were:	-	-	Aarika Ajesh	110
		-	Shuvangee Seth	28
		-	Madiha Javed	26
PLASTIC COLLECTION CAMPAIGN	School	Quantity (Kg)	Families	Quantity (Kg)
EEG collected 11,541 kg of Plastic from 143 participants during the month of September 2022, an increase of 12% compared to August 2022. We encourage our participants to reduce the amount of plastic ending in landfills by increasing their collections. The top collectors for the month were:	Our Own High School, Al Warqaa	400	Abdulrahman Ali Al Zaabi	623
	Delhi Private School Sharjah	295	Mezna Ali Al Zaabi	330
	American School of Dubai, Al Barsha	90	Amal Saeed Al Shamsi	275
TONER COLLECTION CAMPAIGN	School	Quantity (Pcs)	Families	Quantity (Pcs)
EEG collected 667 pieces of Toners from 21 participants during the month of September 2022, an increase of 52% compared to August 2022. Dear participants please be active in the year 2022. The Top collectors were:	Delhi Private School Sharjah	10	Arya Ajesh	100
			Ananta Manikandan & Bhakti Venkatesh Hegde (Tie)	90
			Ashitha Ganesan	30
MOBILE COLLECTION CAMPAIGN	School	Quantity (Kg)	Families	Quantity (Kg)
EEG collected 386 pieces of Mobile Phones from 11 participants during the month of September 2022, an increase of 23% compared to August 2022. We look forward to register growth in October. The Top collectors were:	-	-	Rose Vincent	78
			Rimjhim Singh	36
			Ashitha Ganesan	34
GLASS COLLECTION CAMPAIGN	School	Quantity (Kg)	Families	Quantity (Kg)
EEG has collected 10,978 kg of Glass Bottles from 66 participants during the month of September 2022, an increase of 32% compared to August 2022. We thank our participants for their support and encourage them to continue collecting to help us achieve our targets this year. The Top collectors were:	American University of Sharjah	40	Mark monteiro	178
			Fateem Ali Al Zaabi	99
			Saher Vidya Kumar	85
E-WASTE COLLECTION CAMPAIGN	School	Quantity (Kg)	Families	Quantity (Kg)
EEG has collected 1,708 kg of E-waste from 28 participants during the month of September 2022, a decrease of 16% compared to August 2022. We encourage our participants to continue collecting and prevent these materials from ending in landfills. The Top collectors were:	Delhi Private School Sharjah	25	Abdulrahman Ali Al Zaabi	195
	Our Own High School, Al Warqaa	10	Afra Ali Al Zaabi	164
			Rafeeka Jamal	141
SCRAP METAL COLLECTION CAMPAIGN	School	Quantity (Kg)	Families	Quantity (Kg)
EEG has collected 118 kg of Scrap metal from 12 participants during the month of September 2022, a decrease of 81% compared to August 2022. We invite and encourage our participants to put more efforts and to join this new programme. The Top collector was:	-	-	Mezna Ali Al Zaabi	17

EEG invites all its members & participants to intensify efforts for this year to contribute significantly to the betterment of our environment and achieve the set targets for the above campaigns.
